

In 1971 Brooke Bond Tea issued a new series of collectors' cards. Explore "The Race Into Space" in a new presentation from space expert, broadcaster and author **Jerry Stone FBIS**

"The Race Into Space"

The story of the world's most exciting adventure

By 1971 we had landed on the Moon and were looking forward to further exciting activities in space, including manned flights to Mars.

This series of 50 cards covered what had already been achieved and what was planned for the future.

Space expert Jerry Stone goes through the series, comparing the images to the reality of mankind's achievements in the exploration of space.
